

APOLLO 300

APOLLO 500

TRANSPORT KIT

Heavy cultivator APOLLO can be used for several soil processing with its compact and combine structure. It can be provided an effective soil processing on stubble processing after harvest. It is processed with on requested depth by tearing without tipping the soil. The stubble is mixed to soil by being cut from its root, it becomes organic fertilizer easier for the next product season. Needless grass is decreased. It can be processed on requested depth from 5cm to until 30cm on cursory and deep soil processing. Soil surface seed-bed is prepared in the most convenient way by levelling discs and roller combination. Water keeping capacity of the soil is raised. Our 3m and 3,5 m models are mounted type, 4m and more than 4 m are designed both mounted and trailed with wheels. You can determine and buy the model that is suitable for your conditions by this way. Field traffic was thought with Apollo and it was provided more effective soil processing, less soil compression, thus, as the most important less fuel consumption and less product costs.

APOLLO 600

EASY DEPTH ADJUSTMENT
Easy working - user friendly with spacer clips. No need tools during adjustment

HIGH MANEUVERABILITY DRAWBAR
With 20° Vertical and 40° Horizontal maneuverability our drawbar is designed to move and turn easily in hard soil conditions.

LEVELING DISCS
Rubber Suspension Supported Adjustable Working Depth Forged Robust Steel Hub No Grease - No Maintenance Bearings

SUPPORT WHEELS
Support wheel system provides stable working depth and prevent the machine from swinging. Can be attachable to all models Optional for mounted models and standart for trailed models.

800 kg

- Suitable for all types of soil
- Suitable for deep cultivation at high working speed
- Improving the mixing effect with Router Points
- Maintenance free tine carrier
- 75 cm frame height with 800 kg release force.

APOLLO

HEAVY TYPE CULTIVATOR

CAGE ROLLER

Depth control with medium consolidation and low structure forming on the surface. Relatively prone to jammings in wet conditions and clayey sites.

HELIX ROLLER

Self-cleaning effect due to the vibrating leaf spring. Consolidation with high mixing effect. Levelling capacity which is supported additionally by intermediate springs.

DISC ROLLER

Disc Roller with perfect consolidation on all soil conditions. Cutting and pressing effect. Particularly suitable for stony soils.

For Tractor From 110 to 350 Hp

APOLLO
